## WORK EXPERIENCE

**SOFTWARE ENGINEER | 2025 – PRESENT**
FREELANCING AND PERSONAL PROJECTS

- **EthioKey AI Mobile Keyboard**: Developed an offline-first Android custom keyboard using Jetpack Compose and React Native, featuring dynamic Fidel input mapping and on-device AI predictions.
- **RAG-Integrated Telegram Bot**: Engineered an AI conversational agent using Python and vector store retrieval (RAG) to query complex unstructured domain documents in real time.
- **FaydaJobs.com**: Architected an end-to-end web job portal featuring candidate search pipelines, dynamic job filtering, and employer management interfaces.
- **MalaZone Market Platform**: Built a multi-vendor e-commerce platform supporting merchant storefronts, dynamic product catalogs, and responsive mobile checkout flows.

**JUNOIR FULL-STACK ENGINEER | 2024 - PESENT**
SIDAMA BANK

- **Official Corporate Portal**: Designed and deployed a production-grade corporate web platform tailored for institutional banking services, ensuring strict security standards and cross-device accessibility.
- **Enterprise HRM System**: Engineered an internal Human Resource Management platform automating employee onboarding, leave approvals, attendance tracking, and workforce analytics dashboards.
- **Shareholder Voting System**: Built a secure digital voting and governance portal for general shareholder meetings, featuring real-time vote aggregation, role-based access control, and audit logging.
